

Easy to maintain

Cassette LM 810001

LM extraction instruments are supplied in a convenient cassette that protects both the instrument and the handler during the maintenance cycle. The cassette keeps the instrument from puncturing the sterilization pouch, so sterility is more likely to be assured. The cassette can be color-coded.

Sharpening stone LM 818002

The blades, hand-finished and made from LM-DuraGradeMAX supersteel, will stay sharp and last a long time when properly used and maintained. Sharpen the extracting instruments occasionally using this round sharpening stone as a simple and quick way to keep them in top condition and always ready to use.

LM SlimLift

Luxating instruments designed for extremely narrow places

The LM-SlimLift instruments are especially designed to reach places you cannot go with traditional luxating instruments. It allows tooth extraction to be done as atraumatically as possible. This is important in order to enable rapid healing. The extremely fine tip of the instrument is introduced into the very narrow periodontal space. The instrument is slowly advanced towards the apex of the root while turning the instrument gently back and forth. The LM-SlimLift is not suitable for use as an elevator.

The extremely slim design of blade allows for the most atraumatic extractions

- Ergonomic design – comfortable to hold and easy to rotate
- Secure LM-ErgoTouch surface – light, non-slip grip
- Well-balanced – controlled grip
- Lightweight – less strain on the hands
- Clear color-coding – easy identification
- LM-DuraGradeMAX supersteel – strong and sharp blades
- Tight seam at blade juncture – hygienic
